

Description: wireless remote control switch, the use of digital remote control, through the relay normally open / the normally closed contact of the control circuit of the load. Wireless remote control by use of the code, to avoid mutual interference between, can very easily on the circuit control. Can bring E27 energy saving lamp, LED bulb, incandescent lamp, etc.

Product application site: home, shopping malls, offices, factories, warehouses, hospitals and other places of lighting, can be combined with the wall switch to achieve the lighting of the lighting control, convenient and comfortable.

Product features: the product supporting remote control signal transmission mode for RF signal emission can penetrate walls and no direction, can launch a full range, the receiver can also be full range received each other from range and obstacles (effective emission and receiving distance range). The remote control design is small, can carry on, the true everywhere is convenient, lets the comfort and convenience in every corner of your life.

Feature:

100% Brand New!

Material composition: plastic

Remote control battery: 23A 12V

Remote control distance: more than 30 meters

Technical parameters: working voltage: AC185V-265V

The number of outputs: single

Load-bearing load:

Bulb: not recommended

Energy saving lamps \leq 60W

Led light \leq 40W

Remote control mode: wireless remote control

Remote control distance: 30 meters

Remote control shell: 95 * 40 * 16mm
