

parameter

Efficiency: IE 2

Protective Feature: Fully enclosed

Type: Micro motor

Construction: permanent magnet

Certification: ROHS, CE, CCC

Idle speed (RPM): 6000r / min at 24V

Commutation -: Brushless

Voltage (V): 12V - 24V

Shaft length 15 mm

Diameter: 2.0 mm

characteristic

Electric motor, low noise, low current and no spark.

Wiring method

Red cable is positive.

Black cable is negative.

White cable is control cable for forward & backward direction

Connect with black cable runs motor in forward direction.

Do not connect with white cable running motor in reverse direction.

Caution: You must connect red and black cables. Otherwise it will burn a drive plate.
