RF 433mhz wireless remote control switch Over a long distance DC3.3V-12V learning controle remoto Video presentatio

Item specifics
Package:Yes
Frequency:433 MHz
Model Number:Wireless remote control switch
Channel:1
Use:Universal
Remote control distance:Open environment of about 200 meters, can penetrate wall remote control
Load power:10 watts of electricity within the device
The input supply voltage:Output supply voltage
Operating Voltage:DC 3.3v to 12V (Wide voltage universal)
The world's smallest :Miniature,Ultra-small,Mini,Remote control switch
Low power consumption:Power supply remote control switch
tiny Switch module:Wireless remote switch
Wireless switchgear:Power controller
Lithium battery remote control switch:power ups ,Power outage,Remote control switch
Remote control circuit breaker:Remote control energy - saving switch
module size: 2.41inch*1.12inch*0.48inch

Description
1.360 Degree,No dead Angle
2.RF Remote Control Switch,can through walls
3.Ultra low power,responsive quickly
4.Super small size ,factory direct sale
5.Products small size, wiring simple, suitable for DIY modified
6.Remote control directly control the power of open and close

Product scope
LED lamps and lanterns. WIFI devices. Wireless monitoring equipment. The battery switch. Electric control lock. Press the power switch. A small motor. The motor. Buzzer. The electromagnet .Laser .Electronic circuit board power supply equipment

Product parameters
Working voltage：DC 3.3V to 12V
Module dissipation：7mA
Product frequency:433MHZ
The output voltage=The input voltage
Load power: Less than 10 watts of equipment
Module size: 0.73inch*0.43inch*0.19inch
Remote control size：2.31inch*1.51inch*0.53inch
Remote control distance: open environment of about 200M

## Product wiring instructions

The power input voltage equal to the power output voltage

For example

The input voltage is equal to "5 v" then the output voltage is equal to "5 v"

Click on the lock button, Power supply module output，power on ;Click shut key，Power supply module output，power off

Products small size, simple wiring，The wireless remote control directly，the power of on and off
