DC 12V Motor Remote Switch Controller 12V 24V Motor Forwards Reverse Up Down Wall Transmitter Manual Button Limit Switch

Package Include:

1 x Receiver: (with cover)

1 x Transmitter: (without battery)

Product Description

Features/ Application:

- High confidentiality, large storage , stable performance and dispensing wi th traditional jumpers or switches coding, just wireless remote control w ill be fired the receiving signal controller, make this controller receive a nd store the signal from remote control.
- Apply in many kinds of wireless devices – including hand-held and portable units, window/door transmitters and a variety of detectors and other devices.
- Commonly used to control those wireless products in family, office, hotel, hosp ital, shopping malls, warehouse etc.

1, Operating voltage	DC12V/24V
2, Operating frequency	315/ 433.92 MHz
3, Frequency deviation	±0.2MHz
4, Operating temperature	-40’C ~ +80’C
5, Receiving sensitivity	108dBm
6, Modulation	AM
7, Signal output method	L4:Latch-signal,M4:Momentary-signal,T4:Toggle-signal
8, Decoder chip	fixed code (PT2272/ PT2262/PT2264/SC2262),learning code(EV1527),
9, Size (L*W*H)	68*48*16.8mm
10, Transmitting Distance	10-1000m

Learning method:

press the learning button 1 time ,the LED indicator flash then press the transmitter button A , until the LED indicator stop ,it mean button A learning successfully

press the learning button 2 times ,the LED indicator flash then press the transmitter button B , until the LED indicator stop ,it mean button B learning successfully

press the learning button 3 times ,the LED indicator flash then press the transmitter button C, until the LED indicator stop ,it mean button C learning successfully

Remove Code:

Keeping press the learning button 8 second , until the LED indicator stop ,it mean remove code successfully
