

12V 1ch wireless remote control light/door switch system 1 Receiver & 3 Transmitter Learning code 315/433mhz z-wave

Package Includes:

- 1 x transmitter(with battery and key ring)
- 1 x receiver(with the cover)

Product Description

12V10A learning code receiver /switch with suitcase cover +transmitter /remote control

This is a high quality wireless control, and it's easy to install

You can turn on or turn off the receiver with transmitter(remote control) from any place within a reliable distance

The wireless signal can pass through walls, floors and doors

There is a slidable cover on the remote control

There is also a hook on the remote control. It's easy for you to carry

It uses fixed coding, stable and reliable

Operating Voltage: DC12V

Maximum Load: 10A

Operating Frequency: 315 MHz/433MHZ

Receiver Sensitivity: -100dBm

Encoding Type: learning code

the output way is adjusted between Jog/inter-lock /self-lock

PCB Size(L x W x H): 35*32*17mm

Remote Control Size(L x W x H): Approx. 55 x 30 x 13mm(2.2 x 1.2 x 0.5 inch)

12v10A RF wireless remote control system /receiver and transmitter

It also mean the output way is adjustable, it can control the motor running in positive and reverse directions directly with the voltage output, it can output 2 CH independent switch signal,

The pin can be adjusted, it can meet the need of all the fixed code remote control design, one remote control can control 2 switches.

The wireless remote control switch it is the widely use wireless remote control controller parts, it use the mini Processor control something intelligently.

Its application range

Garage door wireless remote control system, lamp/light wireless remote control, wireless remote control curtain and so on, it is easy to install and easy to use , Safe and reliable .

working/output way

Jog: press one button is working . loosen your finger on the same button is stop .need one channel switch and one buttons remote control)

Self -lock: press one button for one time is working .press the same button again is stop .(need one channel switch and one buttons remote control

Inter-lock : press one button is working ,press another button is stop . (need one channelswitch and 2 buttons remote control

please notice that here is 1CH and 2 buttons wireless remote control .you can choose the inter-lock working/output way,so all the buttons have been used

Please tell us the working way that you want after you buy it , if you are not the professional person, we would set the working way as your requirement before we ship .

Output way: 1 CH switch signal 12 V voltage

Learning and remove method

1. press the learning code .the indicator flash ,loosen your finger ,press any button of the remote control ,the indicator flash 2 times and off .it mean you learn it successfully .

2. it can learn more than 12 PCS 2262 or 1527 chip with the different code wireless remote control

3. remove/clean :press the learning button about 8 seconds , the indicator turn on to off , it means the information that you keep have been removed successfully

Lern- und Entfernungsmethode

1. Drücken Sie den Lerncode. Die Anzeige blinken, lösen Sie den Finger, drücken Sie eine beliebige Taste der Fernbedienung, die Anzeige blitzt 2 mal und aus. Sie bedeutet, dass Sie es erfolgreich lernen.

2. es kann mehr als 12 PCS 2262 oder 1527 Chip mit dem verschiedenen Code drahtlose Fernbedienung lernen

3. Entfernen / Reinigen: Drücken Sie die Lerntaste ca. 8 Sekunden, die Anzeige schaltet sich aus, es bedeutet, dass die Informationen, die Sie behalten haben, erfolgreich entfernt wurden
