

A channel radio remote switch 12v micro wireless remote switch switch module silent For Led Home Office learning code controller toy lamp dc circuit breaker 6v to 36v

delivery

1 x Remote Control (With battery, standby can be up to a month or more)

1 x module

parameter

Frequency: 433 MHz / 315MHz

Channel: 1

Transmitter Size: 26 * 15 * 9mm

Module size: 60 * 39 * 14mm

The battery model of remote control: 23A 12v

Standby Current: 7mA

Load rating: 2A (less than 15 watts)

Power supply module: 3.7 V to 36 V / Universal

Range: 20m in freefall, can go through walls

Control mode: Momentary (momentary button function, relay / module continues as long as key pressed))

Feature products

1.360 degrees, no blind spot

2.RF remote control switch, can go through walls

3.Ultra low power consumption, high sensitive response

4.Super small size, wholesale of factory

5.Independent coding, many sets will not be interference with each other

Application: led lighting, wi fi devices, wireless monitoring devices, battery switch, electric lock and other devices with button, acuh suitable for motor, buzzer, electromagnet, laser, electronic circuit board power supply equipment

use

Small volume, easy wiring, power to on / off by radio

Control mode will have the voltage that the device needs.

e.g.

Input of devices is 12V, transmitter will output 12V current.

Press the button, the module will output power (relay is switched on).

Release the button, module will not output any current. (Relay is switched off).
