

RF 1CH 433mhz 1 button Wireless Remote Control Switch 12v Light DC3V-24V Mini Receiver Home Office Bedroom Led

Item specifics

Package:Yes

Frequency:433 MHz /315MHz

Channel:1

Use:Universal

remote control color and material:white and plastic

remote control distance :Is greater than 200M

Working Voltage:DC3.3V to 24V

Maximum load current:1A

Standby current:Ultra-low power consumption

Power controller:Low power consumption

The battery model of remote control:6F22 9v(not include)

Remote control distance:200M Empty condition,can through the walls

Product preponderance

- 1.360 degree,NO dead Angle
- 2.RF Remote Control Switch,can through walls
- 3.Ultra low power,High sensitivity
- 4.Super small size,Factory direct sale
- 5.Independent coding, many sets will be not interference of each other
- 6.If need more set of general,please descr
- 7.Products small size, wiring simple, suitable for DIY modified
- 8.Remote control directly control the power of open and close

Product scope

1.LED lamps and lanterns. WIFI devices. Wireless monitoring equipment. The battery switch. Electric control lock. Press the power switch. A small motor. The motor. Buzzer. The electromagnet .Laser .Electronic circuit board power supply equipment

Product parameters

Working voltage: DC 3V-24V

Module dissipation: 7mA

Product frequency:315MHZ

The output voltage=The input voltage

Load power: Less than 10 watts of equipment

Module size: 0.88inch*0.42inch*0.21inch

Remote control distance: Empty distance about 20M(can through the walls)

The power input voltage equal to the power output voltage

For example

The input voltage is equal to "5 v" then the output voltage is equal to "5 v"

Press the ON button, the module will output power (the relay is switched on).

Press the OFF button, the module will not output any current. (Relay is switched off).

Product wiring instructions
