

Voltage: 12V 24V DC; Use speed and direction of motor for remote control Description via remote control button: A: ON OFF; B:change direction; C: speed up; D: Speed Down.

High efficiency, high torque, low heat generation.

It possesses powerful function, stable performance and beautiful appearance. Warranty is one year.

Technical data

Working voltage: DC 12/24V

Silent current: <10mA

Maximum current: <10A

Frequency: 433 MHz

Working temperature: -10~+60° C

Reception sensitivity: >110dbm

Reception range: The open space is more than 50-200 meters

Description about the remote control button

A: ON OFF

B:Change direction

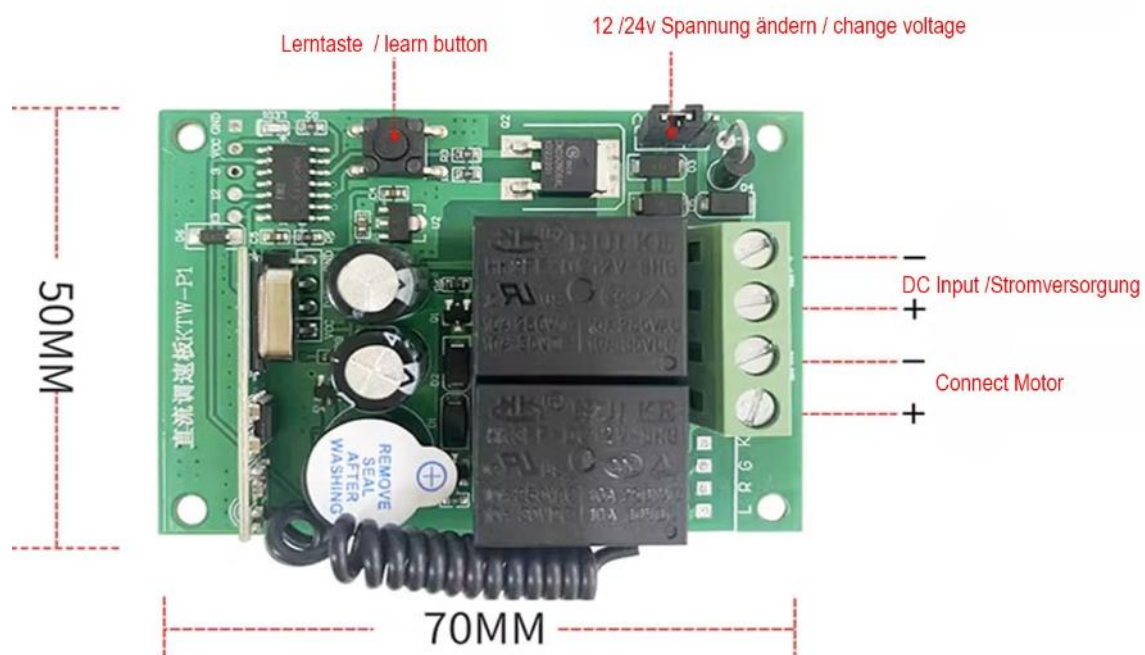

C: Speed Up

D: Speed Down

note: 12v: It is recommended to use motors within 8A

24V: It is recommended to use motors within 5A
